

Assessment Consulting & Development Services

LEXILE® FRAMEWORK FOR READING

When you partner with MetaMetrics®, you benefit from our 35 years in education research and our extensive team of psychometricians, data scientists and researchers. As the trusted developer of a scientifically valid, widely accepted reading metric, we leverage our expertise for your company's success. And success is what you'll experience when you deliver fast, easy-to-understand Lexile® reading measures for students that your customers can use to improve learning.

By Reporting Lexile Measures...

✓ YOU CAN:

- Attract and retain customers who seek or expect an objective, independent reading measure.
- Target and personalize learning within a product by matching students with reading materials at their ability.
- Meet the needs of state departments of education and school districts that are reporting Lexile measures from their high-stakes state assessments.

✓ YOUR CUSTOMERS CAN:

- Be assured that your product is working for them by showing student academic improvement over time.
- Group students and target instruction with level-appropriate reading.
- Communicate among educators, parents and students using an easily understood metric.

We also offer assessment solutions for oral reading, listening and math.

HOW IT WORKS

We work closely with you to develop an assessment solution that produces Lexile reading measures in one of two ways:

Link tests. We can perform a linking study to correlate your assessment's scale score to the Lexile scale so that Lexile measures can be reported.

Build tests. We can build new assessments for you with either:

- Custom test items,
- Validated test items that you lease from us, or
- Your reading passages that we transform into Cloze test items.

“ By providing Lexile and Quantile measures we are able to personalize learning for every child and ensure they graduate prepared for success.”

— Superintendent Molly Spearman
SOUTH CAROLINA DEPARTMENT OF EDUCATION

Receive Lexile measures through our MetaMetrics® Score Interpreter!

The new **MetaMetrics Score Interpreter** delivers Lexile reading measures, providing meaningful data that can be used to interpret student scores. The Score Interpreter includes three components that work together to make your products essential in today's classroom.

With the Score Interpreter you can:

PROVIDE a truer snapshot of student ability and reduce test score fluctuation with continuous scoring with our Scoring API.

FORECAST student reading performance on state end-of-year tests with our Forecasting API.

COMPARE student test results to state proficiency standards with our State Performance Standards Database.

HOW DOES THE SCORING WORK?

The Scoring API leverages continuous scoring, which tracks progress across multiple test events and smooths test scores to reduce fluctuation. By combining prior test data with current assessment results, you will provide a more consistent snapshot of learning over time. Additional features include:

- ✓ Secure transfer of anonymized test data for analysis.
- ✓ Real-time delivery of measures for display within your product's interface.
- ✓ Quick and easy implementation; you don't need to install or manage anything. *We provide all documentation to configure simple code and credentials for access.*

Set Your Product Apart With These Additional Enhancements

These add-ons can bring context to test scores that help frame students' scores related to the milestones and goals that students, educators and parents care about.

ANALYZE STUDENT READING ABILITY FOR COLLEGE & CAREER READINESS for over 400 careers with the **Lexile® Career Database**. Lexile measures are the only metrics available to compare and describe the reading demands of specific jobs.

COMPARE STUDENT TEST RESULTS TO NATIONAL NORMS with **Lexile® National User Norms**. With the norms, educators can compare student test results to national normative percentile rankings.

Contact Us

Raising K-12 student reading achievement is important to your customers, so let's talk about how Lexile measures can help put students on the path to success for school, college and career. For more information on MetaMetrics' consulting and development services, please contact:
