

# Measure Oral Reading Ability on a Scientific, Universal Scale

## Assess Oral Reading With the Lexile Scale!

Oral reading is a foundational skill and a prerequisite to silent reading comprehension. And now there is a research-based way to measure it.

### USE THE LEXILE® FRAMEWORK FOR ORAL READING TO:

✓ Accurately and reliably measure oral reading.

Give your customers Lexile® measures, information they know and trust.

✓ Level your passages.

No more norming your oral reading passages or wondering if they are equivalent in difficulty.

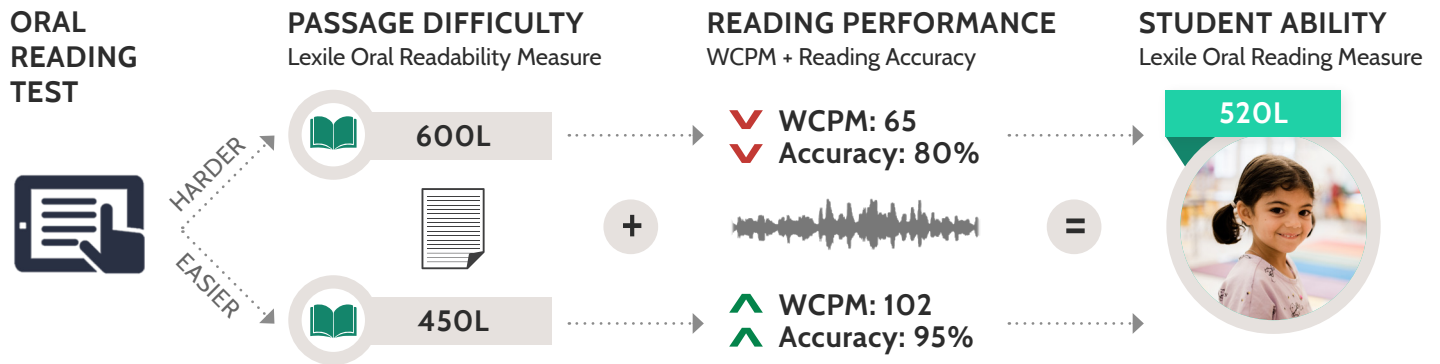

✓ Get a more complete picture of student literacy.

Compare a student's listening, oral and silent reading abilities to determine where interventions are needed.

## How are Lexile measures different than WCPM or accuracy scores?

Words Correct Per Minute (WCPM) and accuracy scores are passage dependent, and research shows the passages students are tested on vary in difficulty.<sup>1</sup> The Lexile oral reading measures takes into account WCPM and accuracy scores but also considers how difficult the passage is to read aloud.

<sup>1</sup> Toyama, et al., 2018

## How It Works In Your Product

We work with all types of companies. Pick the solution that meets your needs.

 SOLUTION	 WHO IS THIS BEST FOR?	 HOW WE WORK WITH YOU
<b>API Integration Service With Your Teacher-Administered Assessment</b>	Those who offer a teacher-administered assessment. <i>(print or digital)</i>	You send test passages, WCPM and accuracy scores to us via an API. Based on this information, we return Lexile oral reading measures.
<b>API Integration Service With Your Automated Speech Recognition Provider</b>	Those who already assess oral reading and use a third party to do the speech processing and scoring.	We validate speech recognition processing and provide an API to return Lexile oral reading measures.
<b>Our End-to-End Solution With Test Development + Automated Speech Recognition API</b>	Those who would like passage content and an automated scoring solution for oral reading assessments.	We develop and/or prepare oral reading assessments and provide automated scoring services through our Approved Providers (e.g., Carnegie Speech).

## With our End-to-End Solution, you get more data for your students!

Provide the same data that other oral reading assessments offer, as well as additional information that teachers want.

-  WCPM
-  Reading Accuracy
-  Student Lexile Oral Reading Measure
-  Passage Lexile Oral Readability Measure
-  Words for Students to Practice
-  Reading Feedback (e.g., Good job reading sight words quickly and accurately. Remember to pause at the ends of sentences.)
-  Future features including expressiveness evaluations and pronunciation accuracy.
