

MetaMetrics is taking **three actions** to support our state partners during the COVID-19 crisis.

First and foremost, we will continue to respond to your **individual state requests for resources and professional learning opportunities**. Your MetaMetrics States Services and Support Team, shown below, is currently working with Alabama, Connecticut, Kentucky, South Carolina and Wyoming to customize materials unique to the state's needs to ensure students continue to learn while at home and to provide the on-demand professional learning required to realize those opportunities. We urge you to contact the team, if you haven't already, to explore ways in which we can help you meet your state's unique needs.

Second, we have curated a [remote learning resources page](#) featuring tools and other resources that leverage Lexile and Quantile measures. This resources page, which—in part or in its entirety—can be edited and promoted through your statewide communication channels, is posted within our [State Implementation Toolkit](#). We encourage you to bookmark this resources page as we will continue to update it as new information becomes available.

And **lastly**, as an education research company, your input into our research agenda is invaluable. Until further notice, **we will need to pause on our annual visits and any scheduled face-to-face meetings with state partners**. We will, however, continue to stay in touch virtually to ensure that your voice is heard and your statewide priorities are considered as we enhance our research agenda.

Our ultimate goal is to support you and your state's initiatives as we all continue to navigate these uncharted waters together.
